CONFIDENCE  
GROWS  
HERE

The proven performer  
you can bank on

InVigor<sup>®</sup> T 4510 has been offering growers solid and dependable performance across a range of growing regions since it was first trialled in 2013. That's why it's one of the most popular TT hybrids on the market.

## So why choose InVigor T 4510?

- Higher yields and gross margins than other well-established TT hybrids.
- Great financial returns when compared to farmer-retained TTs.
- Ideally suited to low-medium to medium rainfall areas – offering solid results in an average season and great results in a good one.

## A productive alternative to OPs

WA NVT predicted results (ATR Stingray was not trialled in 2019).

## A profitable alternative to OPs

Still growing OP TTs? There's enormous value in switching to InVigor T 4510. The average gains in yield and profit shown here are based on three years of NVT data comparing Bonito with InVigor T 4510.

	NSW	SA	VIC	WA
<b>EXTRA YIELD/ha =</b>	360 kg	350 kg	400 kg	380 kg
<b>EXTRA PROFIT/ha =</b>	<b>\$137</b>	<b>\$131</b>	<b>\$159</b>	<b>\$148</b>

Yields based on long-term mid NVTs 2016–18. Profitability calculations based on these assumptions: canola grain delivery price \$550/t, hybrid seed cost \$70/ha sown at 2.5 kg/ha, farmer-retained Bonito graded and treated cost \$10/ha sown at 3 kg/ha. Additional Bonito cost of \$5/t EPR on grain delivery has not been factored in.
